More reasons to use TransCath Catheters

1. Non-irritating soft junction hub for maximum patient comfort in prolonged use
2. Radiopaque lumen and tip
3. Non-kinking extra-soft extension lines
4. Effective sliding clamps for total flow-control
5. Length markings for accurate catheter placement
6. Colour-coded Luer locks with injection site caps
7. Protruding, adjustable fixation wing at the channel junction for securing the catheter at the puncture site
8. Kink-pooof nitinol core spring guide wire with flexible J-tip
9. Luer-Lock syringe for leakproof usage
10. Kit contains introducer needle, scalpel, dilator, and more

Our catheters are manufactured, end-to-end, in India, for the first time ever by leveraging local technology and supply-chain expertise.
